2.40 (b) (2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

***In the big dog barn there was one dog that had a cherry eye on the right eye. There was one other dog that was noted to have multiple large interdigital cysts bilaterally in front paws and on the hind left paw.

Appropriate prevention decreases the risk of infection.

The owner needs to establish and maintain an effective program of veterinary care to assure that appropriate methods to prevent, control, diagnose, and treat diseases and injuries are being used in order to be in compliance with this regulation.

Affects 2 adult dogs.

3.1 (c) (3)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(c) Surfaces--

(3) Cleaning. Hard surfaces with which the dogs...come in contact must be spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to...reduce disease hazards.

***In the adult housing sheltered facility, on the outdoor portion there were 12-hinged doors that had dirt and grime on them.

Proper cleaning and sanitation of all surfaces decrease the risks of disease hazards.

The owner needs to establish and maintain an effective program of cleaning and sanitation to...reduce

disease hazards.

Affects 24 adult dogs.

To be corrected by June 20, 2010.

3.6 (a) (2) (ix) **REPEAT**

PRIMARY ENCLOSURES.

Sec. 3.6 Primary enclosures.

Primary enclosures for dogs and cats must meet the following minimum requirements:

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(ix) Enable all surfaces in contact with the dogs... to be...replaced when worn.

***In the adult housing sheltered facility, in the indoor portion, bottom row, middle two pens, the wire flooring was detached from the divider wall in between the two pens exposing a hole with sharp edges on the wire.

Worn surfaces increase the risks of injury to the animals contained in the primary enclosure.

The owner needs to establish and maintain an effective program of maintenance to assure that all surfaces in contact with the dogs are replaced when worn in order to be in compliance with this regulation.

Affects 4 adult dogs.

Inspection began at 1355.

Inspection and exit briefing conducted with owner, Beverly Hicks, ACI and Jamilon Niemann, VMO.

End of report.

2.40 (b) (2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care.

***In the adult building there are approximately 14 dogs with extremely long toenails. It is noted that some of these nails are turning the toes sideways as the dogs walk and hanging down through the wire flooring.

The owner needs to establish and maintain a grooming program that promotes health and well being to the animals in its entirety and that uses appropriate methods to prevent, control, diagnose, and treat diseases and injuries in order to be in compliance with this regulation.

Affects 14 adult dogs.

To be corrected by July 17, 2009.

3.1 (c) REPEAT

HOUSING FACILITIES, GENERAL.

3.1 Housing facilities, general.

(c) Surfaces-

(2) Maintenance and replacement of surfaces. All surfaces must be maintained on a regular basis. Surfaces of housing facilities- including houses, dens, and other furniture-type fixtures and objects within the facility- that cannot be readily cleaned and sanitized, must be replaced when worn or soiled.

***In the outdoor facility and in the big dog barn, there are multiple food and water receptacles and two housing units that have chewed edges that prevent proper cleaning and sanitation.

Inspection Report

Affects 33 adult dogs.

The owner needs establish and maintain a maintenance program that assures that all surfaces are maintained on a regular basis and that surfaces of housing facilities- including houses, dens, and other furniture-type fixtures and objects within the facility- that cannot be readily cleaned and sanitized, are replaced when worn or soiled in order to be in compliance with this regulation.

3.1 (f)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general. Facilities and Operating Standards

(f) Drainage and waste disposal.

Trash containers in housing facilities and in food storage and food preparation areas must be leakproof and must have tightly fitted lids on them at all times. Disposal and drainage systems must minimize vermin and pest infestation, insects, odors, and disease hazards.

***In the big dog barn, under the grooming table, there is a large container with hair and multiple used discarded fly strips in it and is open.

***On the outside of the big dog barn approximately 5 feet from the bull dog pens, there is a large hole in the ground where the gravel has washed out and drainage is pooling on the ground with a large amount of flies around it. Owner states that a load of gravel is scheduled to arrive next week.

The owner need to establish and maintain a program of waste disposal to assure that all trash containers have tight fitting lids on them at all times and that drainage systems are maintained to minimize pest infestation in order to be in compliance with this regulation.

Affects all of the dogs in the big dog barn.

To be corrected by July 17, 2009.

3.6 (a) (2) (i) REPEAT

PRIMARY ENCLOSURES.

Sec. 3.6 Primary enclosures

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(i) Have no sharp points or edges that could injure the dogs.

***In the big dog barn, there are 5 pens that have sharp metal edges on the trim of the hinged doors that have been bent down on the corners and are creating a sharp point within the primary enclosure.

The owner needs to establish and maintain a maintenance program that assures that primary enclosures

2.40 (b) (3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Sec. 2.40 Attending veterinarian and adequate veterinary care (dealers and exhibitors).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and provided, further, that a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian.

***Throughout the facility, there are 15 adult dogs that have slight to moderate amount of matted hair. The owner states that they have started shearing, but have not finished.

Affects 15 adult dogs.

***In the outdoor facility, there is 1 bull terrier in a primary enclosure where bright red blood is noted in the feces. The owner states that this dog was just moved to this pen due to incompatibility with another dog and that the blood in the feces was just noted yesterday (March 11, 2009). The owner also states the dog probably needs to be wormed.

Affects 1 adult dog.

***In the big dog barn, there are 3 English Bulldogs that have green matter in their eyes. The owner states that she is treating the dogs with some cream and saline and that this problem usually "goes away within a few days."

Affects 3 adult dogs.

***In the big dog barn, there are 5 English Bulldogs that are noted as to have hair loss. The owner states that 1 of these dogs "blows her coat" each time she goes into her heat cycle and that it is time for her to be in heat.

Inspection Report

Affects 5 adult dogs.

***In the big dog barn, there is 1 English Bulldog that has a cherry eye.

Affects 1 adult dog.

The owner needs to establish and maintain a program of direct and frequent communication so that timely and accurate information on problems of animal health, behavior, grooming techniques and well-being is conveyed to the attending veterinarian in order to be in compliance with this regulation.

To be corrected by March 14, 2009.

3.1 (c)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(c) Surfaces--(1) General requirements. The surfaces of housing facilities--including houses, dens, and other furniture--type fixtures and objects within the facility--must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled.

***In the adult sheltered facility, the main walk-way has a large tear in the linoleum exposing the wooden sub floor.

The owner needs to establish and maintain a program of maintenance to assure that all surfaces within the housing facility are constructed and made of materials that allow them to be readily cleaned & sanitized or replaced when worn or soiled.

Affects all of the dogs in the adult sheltered facility.

To be corrected by March 20, 2009.

3.3 (b)

SHELTERED HOUSING FACILITIES.

Sec. 3.3 Sheltered housing facilities.

(b) Ventilation. The enclosed or sheltered part of sheltered housing facilities for dogs and cats must be sufficiently ventilated when dogs or cats are present to provide for their health and well-being, and to minimize odors, drafts, ammonia levels, and moisture condensation. Ventilation must be provided by windows, doors, vents, fans, or air conditioning. Auxiliary ventilation, such as fans, blowers, or air-

conditioning, must be provided when the ambient temperature is 85 [deg]F (29.5 [deg]C) or higher.

***In the big dog barn, there is an odor of ammonia. The owner states that the heat was turned on again last night due to the drop in temperatures.

The owner need to provide ventilation to this building to provide for their health and well-being, and to minimize odors, drafts, ammonia levels, and moisture condensation in order to be in compliance with this regulation.

Affects all of the dogs in the big dog barn.

To be corrected by March 20, 2009.

3.4 (b) (4) REPEAT OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities.

(b) Shelter from the elements. Outdoor facilities for dogs or cats must:

(4) Contain clean, dry, bedding material if the ambient temperature is below 50 [deg]F (10 [deg]C). Additional clean, dry bedding is required when the temperature is 35 [deg]F (1.7 [deg]C) or lower.

***In the outdoor housing facility, the housing units have very little bedding. The temperature the past 2 nights have been below freezing and the ambient temperature today (by Kestrel 3000) is 32 degrees F. The owner states that the bedding was taken out just a few days ago due to multiple days of temperatures above 50 degrees F.

Affects 7 adult dogs.

To be corrected by March 13, 2009.

3.6 (a) (2) (i) PRIMARY ENCLOSURES.

Sec. 3.6 Primary enclosures

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(i) Have no sharp points or edges that could injure the dogs.

***At the adult sheltered facility, on the outside, left bottom row, 4th pen, the divider wire is broken at the bottom causing sharp points to enter 2 primary enclosures.

Affects 6 adult dogs.

Title:

Inspection Report

***In the big dog barn, 3rd pen on the right and 2nd pen on the left, the metal trim around the exit doors is bent into the primary enclosures and have sharp points on them.

Affects 3 adult dogs.

The owner needs to establish and maintain a program of maintenance to assure that the primary enclosures have no sharp points or edges that could injure the dogs in order to be in compliance with this regulation.

To be corrected by March 20, 2009.

3.9 (b)

FEEDING.

Sec. 3.9 Feeding.

(b) Feeding pans must either be made of a durable material that can be easily cleaned and sanitized or be disposable. If the food receptacles are not disposable, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Sanitization is achieved by using one of the methods described in Sec. 3.11(b)(3) of this subpart.

***In the big dog barn, there are multiple food receptacles have chewed edges on them or have holes chewed completely through them.

The owner needs to assure that all feeding pans are either be made of a durable material that can be easily cleaned and sanitized or replace them in order to be in compliance with this regulation.

Affects all of the dogs in the big dog barn.

To be corrected by March 31, 2009.

This inspection was conducted at 0900.
Exit interview was conducted post inspection.

3.4 (b) (4)

OUTDOOR HOUSING FACILITIES.

Sec. 3.4 Outdoor housing facilities.

(b) Shelter from the elements. Outdoor facilities for dogs or cats must:

(4) Contain clean, dry, bedding material if the ambient temperature is below 50 [deg]F (10 [deg]C). Additional clean, dry bedding is required when the temperature is 35 [deg]F (1.7 [deg]C) or lower.

***There are 3 outdoor pens that have igloos for housing units that have no bedding material in them. The weather has been reaching temperatures of 20 & 30 degrees F at night for approximately the past week.

The owner needs to establish and maintain a program of assuring that clean, dry, bedding material is placed in these areas for the dogs when the temperature is below 50 degrees F and additional bedding is placed in these areas if the temperature is below 35 degrees F.

Affects: 5 adults

To be corrected by November 24, 2008.

3.11 (d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Sec. 3.11 Cleaning, sanitization, housekeeping, and pest control.

(d) Pest control. An effective program for the control of insects, external parasites affecting dogs and cats, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

***In the big dog barn, along the top back wall of the primary enclosures and on the main walkway, mice droppings are noted.

The owner needs to establish and maintain an effective pest control program to reduce contamination by pest in animal areas.

Affects: approximately 40 adults

SALEM, MO 65560

3.6 (a) (2) (xi)

PRIMARY ENCLOSURES.

Sec. 3.6 Primary enclosures.

Primary enclosures for dogs and cats must meet the following minimum requirements:

(a) General requirements.

(2) Primary enclosures must be constructed and maintained so that they:

(xi) Provide sufficient space to allow each dog and cat to turn about freely, to stand, sit, and lie in a comfortable, normal position, and to walk in a normal manner.

***In the adult sheltered facility and in the big dog barn, there are 3 pens that do not provide enough space for the amount of dogs in each pen. Pen #1 contains 4 dogs. Pen #2 contains 4 dogs. Pen in the big dog barn contains 7 dogs. These dogs cannot turn about freely, stand, sit, walk, or lie in a normal, comfortable position.

The owner needs to provide sufficient space for each dog to turn about freely, stand, sit, walk and lie in a normal, comfortable position in order to be in compliance with this regulation.

Affects 15 dogs.

To be corrected by August 15, 2008.

***Discussed utilizing the attic fan in the adult dog building more often than it is currently being used.

***All noncompliant items from April 15, 2008 are now in compliance.

This inspection was conducted at 0915.
